Introduction

Continence is a relatively high cost area and the prescribing of catheters and associated accessories is becoming increasingly complex with the variety of product choices available.

This guidance aims to facilitate the rational prescribing of catheters and associated accessories to promote good clinical practice and cost effective prescribing. The recommendations made have been developed by a team of bowel & bladder nurse specialists, continence lead specialists, infection prevention and control nurses, urology nurse specialists, GP practice nurses and CCG medicines management teams working in both primary and secondary care sectors within Kent and Medway NHS.

Recommendations made have taken in to account all available published evidence and guidance. Product selection included as approved formulary choices have been made on basis of design, reliability, ease of use and relative cost. Local expertise and experience in the use of products has also been taken into account.

Please note this is a first choice list of catheters and accessories. Should any of these products not be suitable for the patient after trial, selection of an alternative suitable cost-effective catheter or accessory should be made. Justification for this choice should be documented in the patient notes. This list will be reviewed in 2 years from publication.

When prescribing:-

- a) **Include full details of product required** – Prescription requests must include full details of the required product (including the product name and order code specified in this formulary) to ensure the correct size, type, quantity and gender (for catheters) are ordered.
- b) **Do not prescribe generically** - The brand and order code of the catheter and associated accessories should be stated to ensure continuity of supply. Products should not be prescribed generically because of differences between individual products in terms of specification such as size.
- c) **Clearly state the quantity of product required** – Always order in multiples of minimum pack size for the products and stated in this guide. Avoid use of the term ‘OP’ (or original pack) because pack sizes often differ between products and patients may receive inappropriate quantities if this is not clearly stated.
- d) **Encourage the patient or patient’s carer to request repeat prescriptions** via the GP practice instead of via the appliance contractor. This ensures the patient remains in control and the GP practice can monitor requests (i.e. the same control that a GP uses when issuing prescriptions for medicine)

Long term catheters

- Frequency of change – up to 12 weeks. Catheters are licensed for both urethral/supra pubic use.
- Prescribe 2 initially and then one every 12 weeks. Ensure patient has 1 spare available. Packaged in single units.

Intermittent catheters (ISC)

- Catheters are for single use only. Recommended quantity: 120-180 catheters per month.
- How many a patient uses a day depends on their medical reason for ISC ranging from 1-5 daily.
- Suitable for patients with incomplete bladder emptying. Patient needs good dexterity and cognitive ability.
- Lubricating gel is not needed with these catheters as they are pre-lubricated.
- A number of items are included to clarify position in therapy.

Leg bags

- Leg bags may be worn in different positions on the leg (inside thigh/calf) which will determine the length of the inlet tube.
- Leg bags should be changed every 5-7 days. Recommended quantity: 5 bags per month. No more than one box of 10 should be issued on a single prescription (6 x 10 boxes a year).
- Maintaining a closed drainage system reduces risk of infection.
- Leg bag must remain connected to the catheter and linked to the night bag if additional drainage capacity required overnight.

Night bags

Non drainable, single use night bags

- Suitable for night time use. Position should be below bladder level to enhance drainage.
- Nursing/residential homes should always use a single use non-drainable night bag attached to leg bag.
- Night bags should be used in conjunction with a catheter stand, available from both L.IN.C Medical and CliniSupplies (not available on FP10).
- Non-sterile bag can be connected to a sheath or leg bag, not direct on a catheter
- Recommended quantity: 30 bags per month.

Choice	Bag size	Product	Unit price	Order code	Pharmacy ordering PIP code
LINC Medical Single use, sterile/non sterile, twist tap, individually wrapped	2000ml	LINC-Flo sterile non-drainable night drainage bag LM2LS 2litre, 100cm tube (L.In.C. Medical Systems Ltd)	£0.26	LM2LS	3054806

	3000ml	LINC-Flo single use sterile drainable night drainage bag LM3LS 3litre, 120cm tube (L.In.C. Medical Systems Ltd)	£0.52	LM3LS	3945201
CliniSupplies	2000ml	Prosys non-drainable night drainage bag P2 2litre (CliniSupplies Ltd)	£0.21	P2	304-0516
	2000ml	Prosys single use non-sterile drainable night drainage bag PSU2 2litre (CliniSupplies Ltd)	£0.31	PSU2	327-6672

Sterile drainable night bags

- Drainable night bags should not be changed more frequently than every 5-7 days because maintaining a closed system reduces the risk of infection.
- Not recommended for nursing/residential homes (due to risk of cross infection).
- Recommended quantity: 5 bags per month.

Catheter Accessories

Catheter retaining straps

- It is important that both the catheter and leg bag are well supported to reduce traction and trauma to the bladder neck/urethra.
- All catheter straps are essentially similar in design and interchangeable for a given size.
- One pack (5) of catheter fixation straps should be ordered every 4 months (Straps will need replacing when elasticity and support is reduced from washing and stretching).
- Recommended quantity: 4-5 straps every 3-5 months.

Choice	Strap size	Product	Unit price	Order code	Pharmacy ordering PIP code
First choice Two silicone bands, can be trimmed to size. Washable at 60°C. Not ideal for patients with manual dexterity issues. Includes scissors in every pack.	Can be trimmed to size	FIX Strip catheter retaining strap (L.In.C. Medical Systems Ltd)	£2.49	151030	4049938
Second choice One silicone band, different sizes available. Washable at 60°C	40cm	Prosys catheter retaining strap adult PCS40 (CliniSupplies Ltd)	£2.42	PCS40	408-5536
	50cm	Prosys catheter retaining strap adult PCS50 (CliniSupplies Ltd)	£2.46	PCS50	408-5544
	85cm	Prosys catheter retaining strap adult PCS85 (CliniSupplies Ltd)	£2.71	PCS85	408-5551

Leg bag straps

- Patients preferring to exclusively use leg bag straps will require additional straps.
- Recommended quantity: 10 straps every 6 months.

Choice	Strap size	Product	Unit price	Order code	Pharmacy ordering PIP code
First choice Lasts longer as can be washed, XS-L sizes available	Extra small (35cm)	Deluxe leg bag strap extra small 9663 35cm (Hollister Ltd)	£3.34	9663	293-3786
	Small (38cm)	Deluxe leg bag strap small 9660 38cm (Hollister Ltd)	£3.34	9660	293-3794
	Medium (49cm)	Deluxe leg bag strap medium 9661 49cm (Hollister Ltd)	£3.34	9661	293-3802
	Large (56cm)	Deluxe leg bag strap large 9662 56cm (Hollister Ltd)	£3.34	9662	293-3810

Leg bag sleeves

- Designed to support the leg bag to prevent traction on the catheter.
- Recommended as they can provide better support and comfort to the patient over leg straps.
- Recommended quantity: 4 sleeves every 3-4 months.

Choice	Sleeve size	Product	Unit price	Order code	Pharmacy ordering PIP code
First choice Colour coded	Small	Prosys leg bag sleeve small PLS3881 24cm-40cm (CliniSupplies Ltd)	£1.90	PLS3881	382-4711
	Medium	Prosys leg bag sleeve medium PLS3904 36cm-50cm (CliniSupplies Ltd)	£1.90	PLS3904	382-4729
	Large	Prosys leg bag sleeve large PLS3928 40cm-65cm (CliniSupplies Ltd)	£1.90	PLS3928	382-4737

Catheter stabilisation devices

- Recommended quantity: 5 devices per month.

Choice	Size	Product	Unit price	Order code	Pharmacy ordering PIP code
First choice device Patented swivel retainer	Standard	StatLock all silicone foley catheter stabilisation device FOL0102DT (Bard Ltd)	£2.58	FOL0102DT	309-2418
First choice clip Silicone technology	Standard	Ugo fix gentle catheter clip 3004 (Optimum Medical Solutions Ltd)	£2.51	3004	394-9054

Catheter valves

- Catheter valves are for use with an indwelling urethral catheter as a discrete alternative to wearing a leg bag and in patients prior to trial without catheter.
- Catheter valves must be opened at regular intervals to empty the bladder.
- Recommended quantity: 5 valves per month.

Choice	Valve Size	Product	Unit price	Order code	Pharmacy ordering PIP code
First choice Larger tap, 2-tone colour for better visibility, longer tube	Standard	Prosys sterile catheter valve PCV3942 (CliniSupplies Ltd)	£1.93	PCV3942	386-3800
Second choice Lock available for tap, use only for special population groups i.e. dementia	Standard	Flip-Flo sterile catheter valve BFF5 (Bard Ltd)	£2.67	BFF5	219-0577

Urinary sheaths

- Can offer valuable alternative method or urinary incontinence management for men.
- Important to accurately assess for type and size of sheath using manufacturers measuring device.
- Recommended quantity: 30 sheaths per month. Ordering more than 1 box of 30 a month may indicate poor fit – refer for advice.

Catheter maintenance solutions

- Should be clinical rationale for use.
- Should be considered for short term use only and placed on acute prescription.
- Solution is used to treat indwelling catheters for prevention of encrustation, or to dissolve crystal formation prior to removal of catheter to prevent urethral trauma.
- New evidence suggests to use Polihexanide as this has an antibacterial effect compared to normal saline¹.
- OptiFlo S only to be used if allergic to Polihexanide solution.
- Recommended quantity: 1-60 depending on patient need.

¹Brill et al. Decolonization potential of 0.02% polyhexanide irrigation solution in urethral catheters under practice-like in vitro conditions. **BMC Urology**. 2018. 18:49.

Choice	Size	Product (continued)	Unit price	Order code	Pharmacy ordering PIP code
First choice	100ml	Uro-Tainer PHMB polihexanide 0.02% catheter maintenance solution FB99965 (B.Braun Medical Ltd)	£3.43	FB99965	400-2937

	Large	Cath-It Catheter Insertion/Removal Pack large/extra large 908430 (Richardson Healthcare Ltd)	£1.98	908430	EHC524

Catheter lubricant gels

- A sterile lubricant gel should be used prior to all urethral and suprapubic catheterisation to minimise pain, urethral trauma and risk of infection.
- Catheter lubricant gels selected as formulary choices are listed as medical devices and so do not require either a prescription or a Patient Group Direction (PGD) to be used by a nurse.
