

Daily MAR chart checklist for Care Homes

Daily Medicine Administration Record (MAR) Checklist

To be completed once per day. Person completing should check all entries since previous check. Record detail of identified issues, actions required and indicate when resolved using the "MAR chart issues and actions log"

Check should ideally be completed by a member of the team who hasn't administered medicines on that day's medication round – This is to provide a "Fresh set of eyes".

Time check undertaken <small>(AM/PM)</small>																																				
I have checked: Please tick once checked																																				
All residents have had their medicines offered																																				
ALL the MAR charts for gaps and taken measures to update where necessary																																				
All non-administered medicines have the correct omission code on the MAR and a corresponding note on back of MAR or on eMAR system																																				
All refusals have been re-offered and referred to GP if necessary																																				
All variable dose medicines have the "actual" dose given recorded on the MAR																																				
All handwritten entries/amendments (or equivalent) are double signed
