Updated NICE Clinical Guidelines

[COVID-19 rapid guideline: managing COVID-19 Updated May 2024](#)

This guideline covers managing COVID-19 in babies, children, young people and adults in community and hospital settings. It includes recommendations on communication, assessment, therapeutics for COVID-19, non-invasive respiratory support, preventing and managing acute complications, and identifying and managing co-infections. NICE has also produced [COVID-19 rapid guidelines on managing long-term effects of COVID-19 \('long COVID'\)](#) and [haematopoietic stem cell transplantation](#).

In **May 2024**, we updated the guidance on [remdesivir](#) and added a new recommendation on [tixagevimab plus cilgavimab](#) in line with [NICE's technology appraisal guidance on remdesivir and tixagevimab plus cilgavimab for treating COVID-19](#).

[Endometriosis: diagnosis and management Updated April 2024](#)

This guideline covers diagnosing and managing endometriosis. It aims to raise awareness of the symptoms of endometriosis, and to provide clear advice on what action to take when women and people with signs and symptoms first present in healthcare settings. It also provides advice on the range of treatments available. In **April 2024**, we reviewed the evidence and made new and updated recommendations on treatment of endometriosis when fertility is a priority.
